

BARK VASE, 2018**Jochen Holz**

With Bark Vases, Jochen explores the rarely practiced glass blowing technique of lamp working. The work focuses on the materiality of borosilicate glass and a unique process to produce rich textures and complex shapes. Glass is often seen as a material of ultimate perfection, qualities of high polished transparency and vibrant colours. Jochen aims to disrupt this perfection and to break down the pristine nature of glass.

**Borosilicate glass****ø 14 × H 32 cm****Each unique can be made to order****£ 220.00 excl. VAT**
