

## WOOD TEXTURED ICE BUCKET, 2020

Jochen Holz

Wood textured clear glass ice bucket is a distinctive piece with an organic shape and a wood-inspired texture.

The work focuses on the materiality of borosilicate glass and a unique process to produce rich textures and complex shapes. Glass is often seen as a material of ultimate perfection, qualities of high polished transparency and vibrant colours. Jochen aims to disrupt this perfection and to break down the pristine nature of glass.

Borosilicate glass
