

Molecule Lamp

Nicola Cecutti

Nicola Cecutti is a lighting and interior designer based in London. A graduate of Istituto Marangoni Milano, he assembles and transforms found objects to give shape to playful and dream-like sculptural lamps.

The process involves constant exploration and experimentation with mixed media, including industrial building materials, to develop textured surfaces that strongly evoke the natural world.

Some lamps resemble sprouting, oneiric plants, others seem to be ancient stones weathered by erosion and decay — all to highlight a connection to nature.

Calabash, Clay, sand, PVA, acrylic paint, spray paint, polyurethane, electrical components, glass globes, dimmable led bulbs.

20 x 24 x 39 cm

Each unique
