WALL LAMP
PIETRO RUSSO

Simple, elegant and functional, Wall Lamp lights up the room with a warm and scattered light. It consists of brass and glass elements — that also spread and refract the light — and reminds us about the design and philosophy of the early 20th century. The purity of form, combined with the clarity of purpose, turns it into a retro-styled object, yet contemporary and timeless at the same time, integrated with the modern LED technology.
